SUPERVISORY PATENT EXAMINER

DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with attorney Thomas E. Watson (Registration No. 43,243) on October 16,2002.

3. The application has been amended as follows:

In the specification, line 27 of page 11, the phrase "teal time clock" has been changed to --real time clock--

In the specification, lines 20-21 of page 5, the phrase "currently tuned-to tuned channel" has been changed to -- currently tuned-to channel--

In line 11 of claim 1, the phrase " currently tuned-to tuned channel" has been changed to -- currently tuned-to channel--

Allowable Subject Matter

4. Claims 1-20 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Frett (US 5,305,464) discloses controller 14 for use in determining a currently tune-to channel of receiver 20 having electronic display 18 to display the number to which the receiver is tuned. The panel 16 normally is maintained transparent so that the LED display 18 may be readily seen through the panel 16. In order to determine the number being displayed on the LED display 18, the panel 16 is subdivided into panel portions. The panel portions are sequentially maintained transparent while the remainder of the panel 16 is rendered opaque. The light sensor 22 can be used to determine whether light being emitted from the LED display 18 is being transmitted through the panel portions that have been rendered transparent. After all of the panel portions of the panel 16 have been tested, the microprocessor of controller 14 can determine what numbers are being displayed on the LED display 18 by comparing the results of the testing of the areas 26 to characteristic patterns that have been developed for each set of number that can be displayed by the LED display 18 so that the channel to which the receiver 20 is tuned can be identified and information relating thereto can be stored for later evaluation (see figure 1 and col. 3, lines 32-60, and col. 5, lines 36-53). However, Frett fails to disclose electrical connection to the electronic

Art Unit: 2611

display to communicate drive signals and controller 14 receives drive signals transmitted to the electronic display and interprets the drive signals to generate information representative of the currently tuned-to channel.

Regarding claim 11, the prior of record fails to disclose or fairly suggest a system as various system for determining viewership of channel tunable by a set top converter as variously claimed, particularly having the feature of determining the tuned channel by display interface by receiving and interpreting drive signals transmitted to the electronic display of the set top converter and communicated to the collection meter.

Regarding claim 16, the prior art of record fails to disclose or fairly suggest a method of determining a channel to which a set top converter box is tuned using a display interface as variously claimed, particularly having the feature of receiving drive signals at the display interface and determining a channel to which the set top converter box is tuned by sampling the drive signals and generating a coded representing of the determined channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Jarrell (US 6,405,370) discloses television audience monitoring system and method employing tuner interface of set top converter box.

Caporizzo (US 5,574,495) discloses cable television data path error analyzer located at the set top terminal.

Gilboy (US 5,465,113) discloses programmable channel regulating cable television controller.

Zurlinden (US 4,972,503) discloses method and apparatus for determining audience viewing habits by jamming a control signal and identifying the viewer command.

Remillard (US 5,504,519) discloses electronic device 20 comprises readout 85 to indicate the tuned station. The electronic device 20 records and stored the time and date of operation and viewed frequency for periodic uploading to the host computer (see col. 6, lines 5-10).

DATE MAILED: 10/23/2002

Notice of Possible Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there may be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of any fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.
